

Marina Basin and Bridge phase gets planning approval from Stafford Borough Council

We're delighted to report that SRL's Planning application to complete the Marina Basin, open up a link into the Basin from the Staffs & Worcs Canal and construct a bridge over it for walkers and farm traffic has now been given the go ahead by Stafford Borough Council. Our thanks go to the Council for this.

After the significant progress made on the site last year, 2020 has been a frustrating year for obvious reasons.

This planning approval provides the opportunity for us to work towards completing the Project's next Phase.

It also brings us closer to restoring a part of the town's historical heritage and we look forward to the continued support of partners and the people of Stafford.
